

JOHNSON

JOHNSON
80

History

Established in 1987 Johnson Yachts are celebrating thirty years of building high quality luxury motor yachts. Today our range of semi-custom vessels spans 70 to 115 feet. All share the same features in having outstanding internal volume, a striking exterior and excellent performance and handling.

Our company's founder, John Huang, recognized from day one the importance of careful innovative design and quality workmanship; characteristics that are still at the forefront of the business today which remains a family enterprise.

Over 300 Johnson yachts have been built and our owners start benefitting from the moment they place their orders right through what we know will be a long and happy ownership. Our semi-custom build policy allows them considerable flexibility in their vessels internal layout and fittings and once delivered our exceptional global after sales service is always available.

Our business has grown and evolved over the last 30 years, and we felt it was time for a change. We have refreshed our logo to reflect who we are today and to symbolize our dynamic future. The new logo retains elements including the letter "J", hull shape and winds. The hull shape identifies our core business and the wind indicates freedom, by combining both, we strive to continue delivering yachts that has no boundary in ocean exploration.

Choosing Johnson

superior craftsmanship

Johnson Yachts are renowned throughout the yacht building industry for superior craftsmanship, innovative design and overall quality. We employ hundreds of talented craftsmen most of whom have at least 20 years yacht building experience. For us, the creation of a yacht is not merely a product, which also responds to, and extends, the dreams of her owners. Enchantingly, it is most personal acts of creativity an owner can undertake.

Design Team

Bill Dixon and his team at Dixon Yacht Design are, without doubt, one of the world's most highly thought of and respected yacht design teams. They have designed every Johnson yacht built giving each one unique features which are created to not only enhance the pleasure of ownership but to provide a stable, seaworthy vessel with excellent performance.

Refit

In addition to building our own range of motor yachts we provide high quality repair, refit and maintenance services for marine vessels of all types with our own master carpenters, electrical technicians, hardware installers and hull repair staff available on site at all times. Our 12,600 square meters state of the art facility can accommodate up to six 130 foot vessels at one time.

JOHNSON
80

Standing out from the crowd

The new Johnson Motor Yacht range stands out from the crowd, in every respect!!

The Johnson Company has been building outstanding motor yachts for over 30 years and when the decision was taken to create a totally new range they turned once again to one of the world top yacht designers, Bill Dixon. The result from the Dixon team is a stunning range of motor yachts which spans 70 to 115 feet.

The synergy between Dixon Yacht Design and Johnson Yachts is born out of many years of working together, and a mutual respect for each others abilities. The result of this close working partnership can be seen in every yacht in the range, with careful design matched by the renowned skill of Johnson Yachts boat builders and engineers.

The 80, the subject of this brochure, is a fine example of the best of European design married to the best of Far Eastern craftsmanship. If you are in the market for a motor yacht of this size she really must be seen.

Characteristics

Few modern yachts create such a lasting impression as the new Johnson range. The 80's superyacht styling provides her with many more benefits than just looks. The wide beam endows the vessel with an exceptionally spacious interior and the vertical windows give her an external presence on the water normally only found on much larger vessels.

Your first impression on stepping on board the 80 can only be one of quality; not just in the workmanship of the Johnson craftsmen but also in the equipment with which the vessel is fitted.

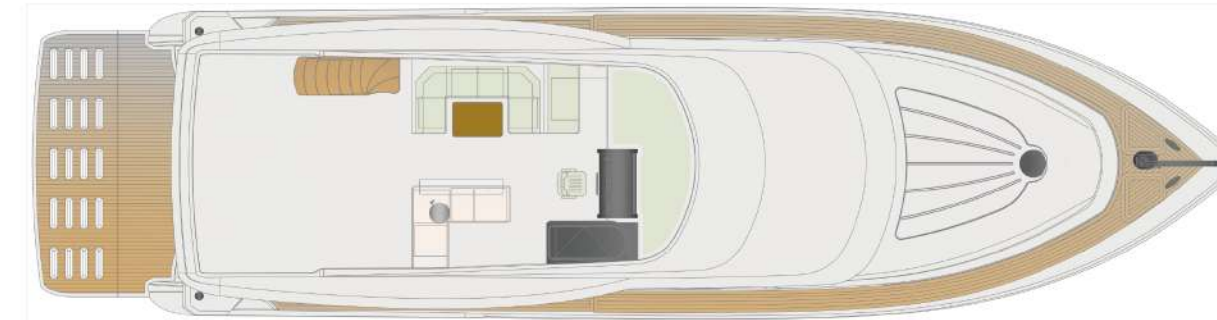

Having been impressed by the look of the vessel both inside and out, your first trip on this outstanding yacht will ensure that your first impressions last! With wide beam also comes stability, and the beam of the 80, allied to the modified V planing hull provides the yacht with excellent performance and a very comfortable ride; a ride which is made even smoother by the standard stabilisers. Low speed handling is impressive and manoeuvring could not be easier with bow and stern thrusters.

With this superb yacht comes Johnsons legendary customer service, which starts before you sign your order, and continues throughout the build and ownership of your boat.

Sky lounge

Flybridge

fishing cockpit

*Your choice
sky lounge or flybridge*

The 80, as with the other yachts in the new Johnson range, is available with either a sky lounge or a traditional flybridge. A 'fishing cockpit' is also available for both flybridge and sky lounge versions of the 80. The choice provides either, more open air deck space in the case of the flybridge version, or a comfortable additional lounge, which has full protection from the elements and provides fantastic views. Both versions feature a wet bar with a fridge and an ice maker.

EXPLORE FINDING

Home from home

Wide beam and superyacht styling give much more than a stable ride and excellent handling. They also provide a yacht interior with living areas comparable with vessels significantly larger. More spacious living areas in the case of the 80, mean among other things the option of either a main deck owners suite or, in its place, the very popular 'country kitchen', option, with the owners suite positioned on the lower deck. Standard equipment levels on the 80 are very high, and of the best quality. One look at the specification page of this brochure and you will realise that at Johnsons we believe that our owners should be provided with all the comforts of home.

JOHNSON 80

The Johnson 80 has a gathering space in the main-deck saloon, a living area located aft with a roomy L-shaped settee and a pair of loose armchairs. With selections from the owners' art collection adorning the bulkheads, the space also has a pair of Ottomans for flexible seating. The aft bulkhead opens wide with a multi-panel sliding door, mixing interior and aft deck spaces fluidly. The main deck is also home to a country kitchen arrangement forward, where an open galley is set off with marble countertops and backsplashes arrayed with stainless steel appliances. With an island and breakfast bar, a table in marching marble is surrounded by an expansive L-shaped dinette to take advantage of the 180-degree views through the forward windows.

NB. This general specification does not constitute an offer for sale of any particular yacht and is for guidance use only. The company reserves the right to change the specification at any time and the specification may vary from one country to another. A detailed specification will, of course, be agreed with our clients prior to the signing of contracts.
